

Advanced Power

The Solar Solutions Experts

Residential & Commercial

Capture the Clean Power of the Sun with Our Custom Solar Solution.

Advanced Power is committed to designing and installing **high-quality** and **reliable** residential and commercial solar systems. Our **expert** electrical engineers and certified solar installers have designed and installed **over 100** state-of-the-art solar systems in California. Join the growing number of **satisfied solar owners** who are well on their way to **energy independence**, significantly **reducing their carbon footprint** and **avoiding future electricity rate increases**.

Experienced professionals

Our solar systems are designed by seasoned electrical engineers with over **25 years** of residential and commercial solar system design experience. Our solar installation foreman is a master electrician and a certified solar installer with over 12 years of experience installing both large and small systems.

High-quality products

We install Sharp® solar panels and components, the **#1 name in solar** system technology products. For over 45 years, Sharp has been developing solar panels that now come with a **25-year warranty** to perform under extreme conditions. Sharp panels also have some of the highest efficiency ratings in the industry and require very little maintenance.

Professional service

We take pride in our first-rate customer service at Advanced Power. We streamline the solar design and installation process so your transition to solar power is seamless and hassle free. Most residential grid-tied systems only take two days to install so your system will be up and running very quickly.

Detailed site analysis

We use the latest solar analysis technology to analyze your site and design the best solar solution for your home or business.

Our detailed site analysis includes:

- Assessing your current and projected electricity usage
- Measuring the size and angles of your roof
- Measuring your site's total solar potential
- Determining the size and orientation of your system

Ground mount and solar shade structures will also be proposed if adequate space is available.

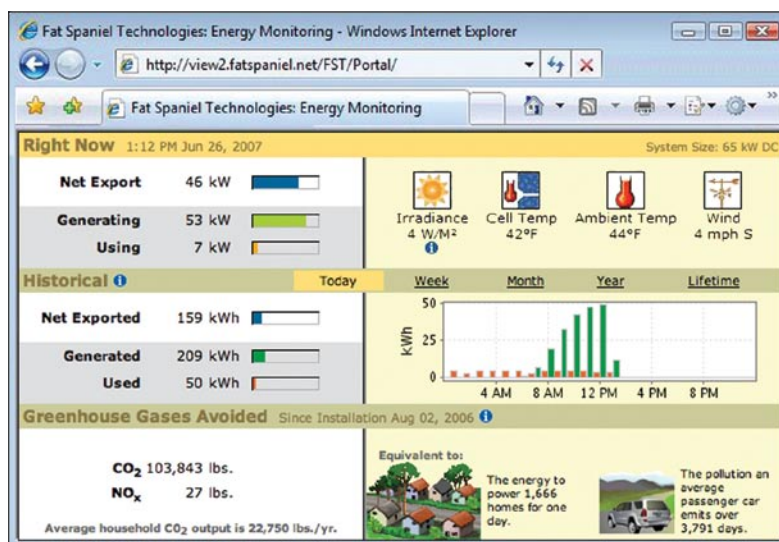

Power generation guarantee

You can have peace of mind that your solar system will perform as designed with our **FREE 5-year power generation guarantee**. We are so confident your system will meet its yearly power production tolerances we guarantee your system's performance. In the event your system does not meet power tolerance projections, we will adjust or reconfigure your system at no additional cost.

System monitoring included

Monitor your systems real-time performance through Fat Spaniel Technologies® Internet-based software. The graphic interface is easy to understand and use. It displays the total energy being generated, exported and currently being used. Historical energy totals are also available for the week, month, year and lifetime of the system.

Sample graphic interface showing solar system performance.

Additional benefits

- Reduce your electricity bill through better management of energy production and usage
- Receive performance-based incentives by meeting California Solar Initiative or other government program requirements for "revenue grade" monitoring and reporting
- Improve system performance with automatic alerts to your service or maintenance provider

Sharp product warranties

Sharp systems are designed with superb durability to withstand extremes of heat, wind, and impact and have proven their dependability in thousands of installations worldwide.

Solar modules are covered by a 25-year warranty for power output.

Inverters are warranted for 5-years. (See detailed Sharp product warranties at http://solar.sharppusa.com/solar/products_overview).

5-year power generation guarantee

We guarantee your system will meet its yearly power production tolerances or we will make any adjustments or reconfigure your system at no additional cost. (See more details about our 5-year power generation guarantee at <http://www.advancedpower.net>.)

Please contact Jane Fontaine at **1-800-622-9622** to schedule your **FREE** solar evaluation with one of our knowledgeable and friendly Solar Sales Associates. Or, visit our web site at **www.advancedpower.net** for more information about our services.
