

UNIVERT

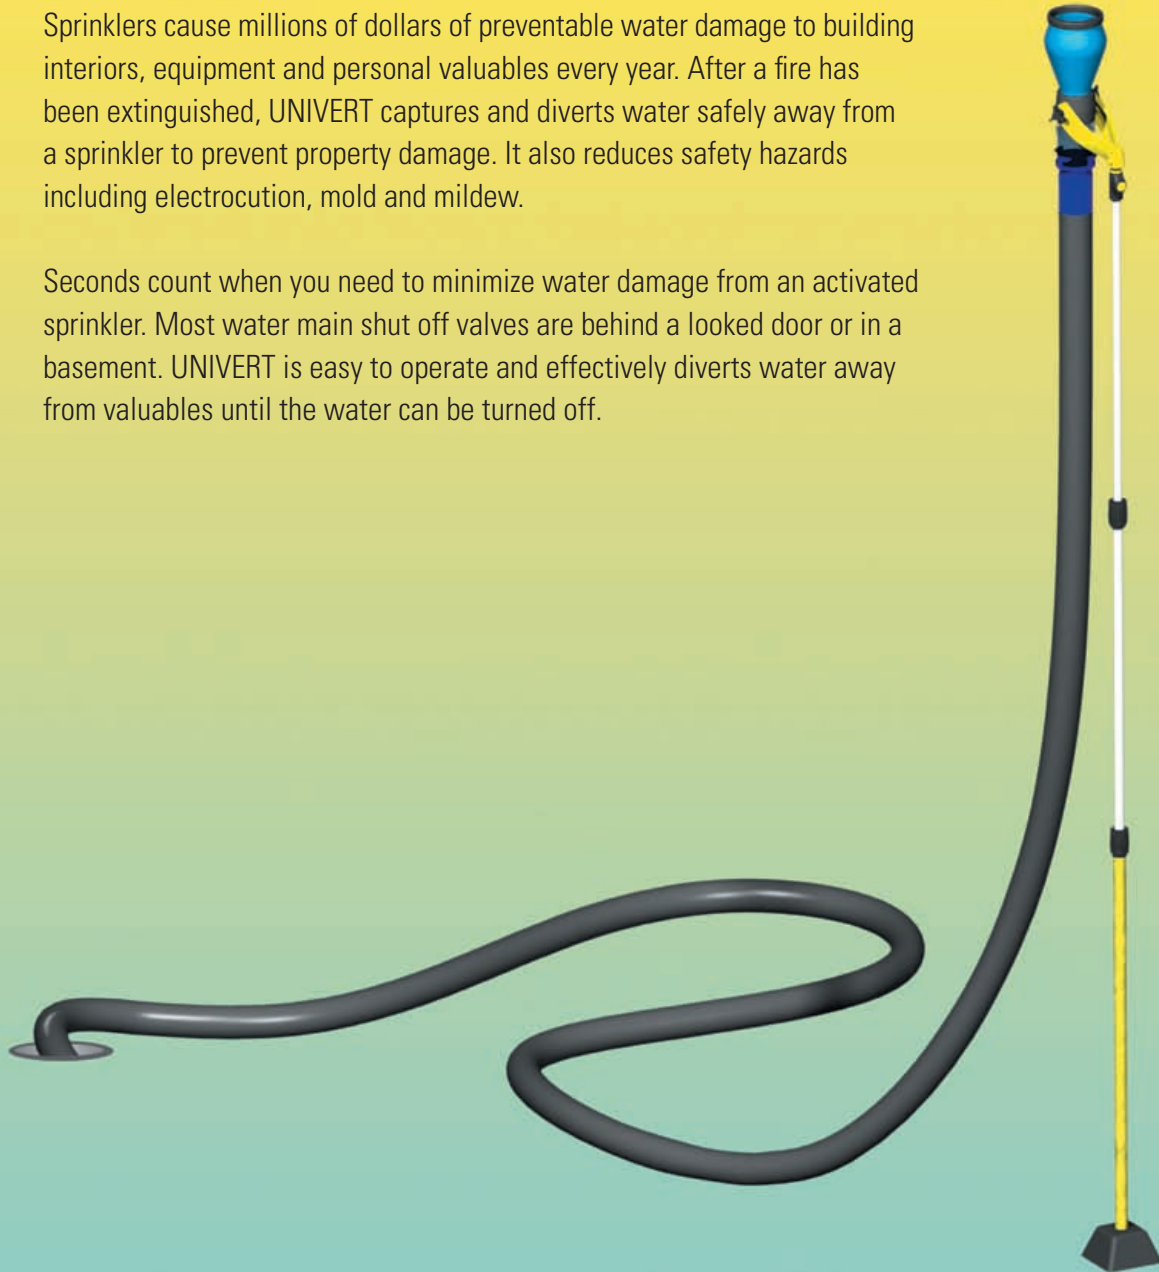

The Universal Sprinkler Water Drain Diverter

UNIVERT minimizes sprinkler water damage

Sprinklers cause millions of dollars of preventable water damage to building interiors, equipment and personal valuables every year. After a fire has been extinguished, UNIVERT captures and diverts water safely away from a sprinkler to prevent property damage. It also reduces safety hazards including electrocution, mold and mildew.

Seconds count when you need to minimize water damage from an activated sprinkler. Most water main shut off valves are behind a locked door or in a basement. UNIVERT is easy to operate and effectively diverts water away from valuables until the water can be turned off.

Reduces water damage

UNIVERT will help minimize damage to:

- › Building interiors and structures
- › Equipment and furniture
- › Electrical systems
- › Appliances
- › Carpeting and rugs
- › Personal valuables and artwork

Features

UNIVERT is made of tough, light weight plastic and is easy to operate. It has innovative features including:

- › Cone head pivots 90° to accommodate various sprinkler positions
- › Rubber rim on cone head to reduce slipping
- › Telescopic support pole extends up to 10'
- › Made of durable plastic which does not conduct electricity
- › Hoses available in 40' and 60' lengths
- › Hose with snap-on connections for quick assembly
- › Heavy duty rubber support pole base for added stability
- › Small size for easy storage

Key markets

Fire sprinkler systems are mandatory in all commercial and high-rise buildings. They are also being installed in older buildings to stop fires and reduce insurance premiums.

Key businesses and organizations for UNIVERT include:

- › Sprinkler installation companies
- › Fire departments
- › Insurance companies
- › Commercial buildings
- › Hi-Rise buildings
- › Hotels and motels
- › Hospitals and nursing homes
- › Schools and dormitories
- › Apartment buildings
- › City, state and federal buildings
- › Residential homes
- › Art galleries
- › Any buildings with sprinkler systems...

Necessary component in the fire prevention and extinguishing product lines

UNIVERT compliments products that prevent and reduce the devastating effects of fire.

Who needs UNIVERT?

Anyone can use UNIVERT to help minimize water damage to their valuable property and assets. Primary users include:

- › Fire professionals
- › Maintenance personnel
- › Security personnel
- › Building management and staff
- › Homeowners and renters

International patents

UNIVERT has international patents that increase it's total market potential in the following countries:

- › United States
- › Europe
- › Canada
- › Japan
- › China
- › Mexico

Specifications

Total height: 11' (fully extended)

Telescopic pole: 10' (fully extended), 3 1/2' (unextended)

Material: fiberglass

Hose: width 2", length 40'

Material: plastic

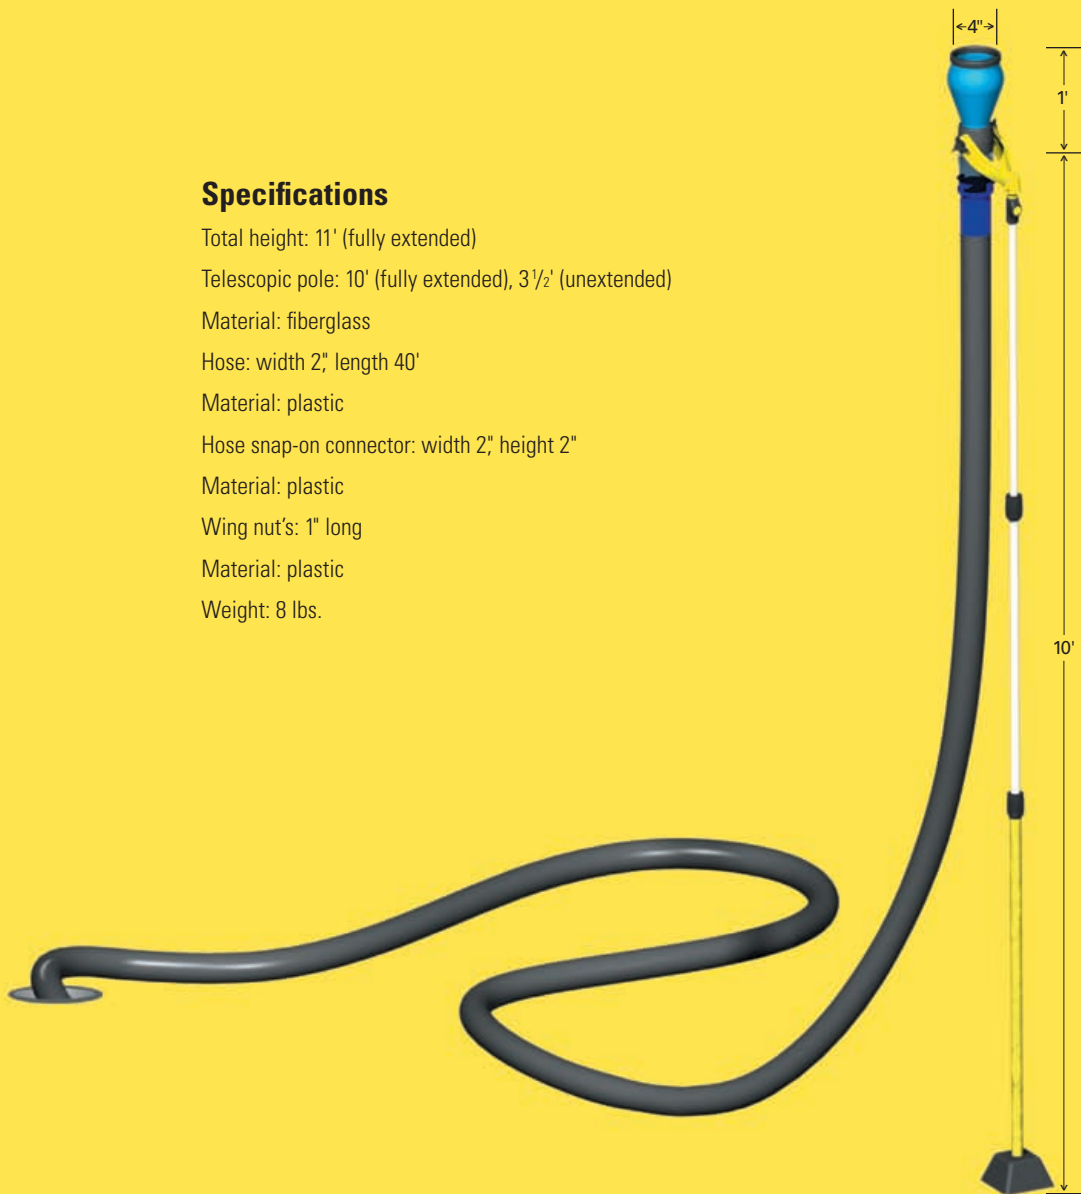

Hose snap-on connector: width 2", height 2"

Material: plastic

Wing nut's: 1" long

Material: plastic

Weight: 8 lbs.
